WAQAR PATHAN

Full-Stack Developer | Web Applications | Automation & Product Systems

Sugar Land, TX • Upwork: freelancers/waqarpathan • GitHub: github.com/pathanwaqar

PROFESSIONAL SUMMARY

Full-stack developer and product-minded systems builder with 7+ years of experience across web applications, frontend interfaces, backend systems, WordPress/PHP, API integrations, automation, and mobile product workflows. I turn messy requirements into clean user journeys, maintainable architecture, reliable integrations, and production-ready delivery. 100% Job Success Score across 85 Upwork jobs.

CORE COMPETENCIES

Full-Stack Web Development	React / Next.js Interfaces	TypeScript / JavaScript
API Integration & Webhooks	PHP / Laravel / WordPress	Database Design & MySQL
Responsive UI & Tailwind CSS	Workflow Automation / n8n	Performance & Technical QA
CMS / E-commerce Builds	Figma-to-Code Delivery	Client Communication & Scope Control

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Vue.js, responsive UI, component-based interfaces
Backend	PHP, Laravel, Node.js, Python scripting, REST APIs, authentication flows, payment/API integrations, server-side logic
Databases	MySQL, PostgreSQL, MongoDB, data modeling, reporting workflows, data import/export, structured content systems
Automation	n8n, webhooks, API-driven workflows, CRM/spreadsheet/email integrations, scraping, data processing, task automation
Platforms	WordPress, Shopify, Webflow, Wix, Squarespace, Unbounce, Vercel, AWS, Firebase
Tools	GitHub, Postman, Figma, Adobe Photoshop, Lighthouse, Google Search Console, browser DevTools, project delivery tools

PROFESSIONAL EXPERIENCE

Full-Stack Developer / Product & Systems Builder

OUTTRED | 2019 - Present

- Lead client-facing delivery across web applications, websites, dashboards, mobile product flows, automation systems, and integrations.
- Build responsive frontend interfaces using JavaScript, React/Next.js-style component patterns, Tailwind/CSS, and CMS-driven page structures.
- Develop backend logic, custom PHP/Laravel/WordPress features, MySQL data structures, APIs, webhooks, and third-party service integrations.
- Translate business requirements into user flows, technical scopes, phased delivery plans, and maintainable implementation decisions.
- Create scripts and automation workflows for reporting, file processing, data handling, scraping, CRM handoffs, and internal operations.
- Manage client communication, scope control, QA, launch coordination, and post-launch support with a focus on stable production delivery.

Senior PHP / Full-Stack Developer

101 IT SERVICES | 2017 - 2019

- Built and maintained backend features using PHP, Laravel, MySQL, authentication logic, content systems, and payment-related workflows.
- Integrated APIs and collaborated with frontend, design, QA, and project teams to turn business requirements into working software.
- Improved performance, debugged production issues, reviewed code, and supported cleaner engineering practices across delivery teams.
- Mentored junior developers and helped keep implementations readable, maintainable, and stable after release.

Web Developer

GRAKOS | 2016 - 2017

- Built and customized client websites using WordPress, Shopify, Webflow, Wix, Squarespace, and related web platforms.
- Handled theme/plugin customization, frontend updates, third-party integrations, troubleshooting, and ongoing website improvements.
- Worked with design, content, and project teams to deliver user-friendly sites, landing pages, and e-commerce functionality.

WAQAR PATHAN

Full-Stack Developer | Web Applications | Automation & Product Systems

Sugar Land, TX • Upwork: freelancers/waqarpathan • GitHub: github.com/pathanwaqar

SELECTED PROJECT EXPERIENCE

Kiteworks.com
- Supported production work on a large enterprise WordPress/WPML website with multilingual content, compliance pages, resources, author archives, navigation, and release coordination.
- Worked around technical SEO-safe publishing, redirects, sitemap/canonical hygiene, plugin/theme conflicts, content QA, and staging-to-production discipline.

HRPal.ca
- Worked on an AI-assisted HR/compliance platform with structured workflows, document generation behavior, controlled outputs, and full-stack product implementation.
- Helped shape the system around practical user flows instead of a loose chatbot-style experience.

Ask Your HVAC Pro
- Contributed to an AI-assisted mobile app using Flutter, OpenAI API, Firebase, and API integrations for guided troubleshooting and production-ready app behavior.
- Focused on app-side architecture, integration stability, and usable diagnostic flow.

OfficeRND / API Directory & Booking Sync
- Built PHP/MySQL integration workflows for OfficeRND data, including API pagination, resource/booking sync, structured storage, directory views, and operational reporting logic.
- Handled data normalization, mapping, sync status fields, and display rules for internal business workflows.

Client Automation & Workflow Tools
- Built scripts and connected workflows for file processing, data cleanup, reporting, scraping, CRM handoffs, spreadsheet/email integrations, and internal team operations.

TECHNICAL DELIVERY STRENGTHS

Product-minded delivery	I define the usable first version, reduce unclear scope, and keep builds practical without blocking future growth.
Frontend implementation	I build responsive interfaces, dashboards, forms, content pages, and conversion flows that stay consistent across devices.
Backend and integrations	I connect APIs, webhooks, databases, CMS platforms, payment/data flows, and admin workflows with maintainability in mind.
Production discipline	I focus on QA, staging checks, documentation, performance basics, launch handoff, and post-launch stability.

EDUCATION & CERTIFICATIONS

Master's Degree	Marshall University | 2016 - 2018
Bachelor's Degree	University of California, Santa Barbara | 2011 - 2015
Certifications	IBM Certified Full Stack Developer (2023); AWS Cloud Architect (2021); PHP Web Developer - Udemy (2017); Idea Sharing Entrepreneur - IBA (2016)
